

ABSTRACT OF THE DISCLOSURE

When a guide wire is inserted into a guide wire  
insertion hole formed in a tip member made of a resin  
tube, firstly, it is inserted into the guide wire  
5 insertion hole substantially from the center of the  
front surface of the resin tube. Then, the guide wire  
is guided to the outside of the resin tube through  
an opening formed in the outer periphery of the tube,  
and guided along the outer periphery of a basket unit.
